DETAILED ACTION

Amendment

1. Receipt is acknowledged of the amendment filed on August 27, 2004. In the amendment
5 claims 1 and 5 were amended. Currently, claims 1-8 remain for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the
basis for the rejections under this section made in this Office action:

10 A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed
in the United States before the invention by the applicant for patent or (2) a patent granted on an application for
patent by another filed in the United States before the invention by the applicant for patent, except that an
15 international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this
subsection of an application filed in the United States only if the international application designated the United
States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by a previously cited
reference to Kawahata (US 6,507,375, hereinafter “Kawahata”)

20 Re claims 1-8, Kawahata teaches a liquid crystal display comprising a plurality of source
bus lines and gate bus lines and a plurality of thin film transistors (see abstract; see col. 2, lines
10+), wherein the overlapping area near the transparent pixel area are designed to have
differently sized overlapping areas (col. 2, lines 40+; col. 4, lines 7+). The overlapping widths
are different at both sides of the source line (i.e., 0.5 to 2 μm to 2.5 to 5 μm). The gates are
25 further treated with the gate insulating layer, which can be considered a protective structure.

Response to Arguments

4. Applicant's amended claims and remarks filed on August 27, 2004 have been carefully reviewed and considered. Citing of a new reference is not in anyway an indication that the previously cited references no longer anticipates or suggests obvious modification. Perhaps, the

5 Kawahata patent (previously cited, although not used in Action) resembles more to what Applicant claims in the presented claims. Accordingly, this Office Action is made non-final.
